1. Naming Convention: BEM (Block-Element-Modifier)

BEM will be used for HTML, CSS, and SCSS:

```
<! -- Example-->
<div class="gallery">
    <h1 class="gallery__title">Gallery</h1>
    <img class="gallery__image gallery__image--large"/>
    <img class="gallery__image" />
    <img class="gallery__image" />
</div>
```

2. SASS (SCSS)

Our project will be organized with the following SASS partials:

- style.scss
    - _header.scss
    - _home.scss
    - _contact.scss
    - _blog.scss
    - _footer.scss
    - _media.scss
    - _setup.scss
    - _variables.scss
    - _mixins.scss

3. Formating
- Single tab (4 spaces) for indentation
- No ID selectors
- Files , folders and project repo follow a consisting naming convention (ie. kabob-case)
- When using selecting multiple element with selectors, give each selector its own line
- Double quotation marks for strings

4. Commenting Style

- Comments at opening
- Comment before each major section(header , main , etc)

5. Colors

- Hex code system will be used (in addition to any variable that may be assigned a hex code colour)

6. Media Queries

```
/* Portrait tablet and small desktops */
@media (max-width: 940px) {
}

/* Landscape phone to portrait tablet */
@media (max-width: 768px) {
}

/* Landscape phones and down */
@media (max-width: 480px) {
/
```
